## 3-PLY WIDE PLANK HARDWOOD FLOORING

BY VIEWRAIL

### Pure perfection.

In a world of mass-manufactured, narrow-plank veneers, v3 is a flooring icon. Exceptional quality meets extraordinary widths in a perfect fusion of engineering and craftsmanship.

Each top-quality piece—hand selected hardwoods curated from North American forests—is chosen for maximum impact. Engineered hardwood flooring, crafted to last a lifetime.

v3 provides three layers of strong North American hardwood, cured for maximum stability and crossbanded for strength, bonded together with a superior adhesion process.

The results are revolutionary:

- 90% more stable than solid hardwood flooring
- 50% more stable than comparable engineered hardwood flooring on Baltic Birch plywood
- Extremely resistant to gaps and cupping, even under the extreme conditions of northern climates

### v3 3-PLY WIDE PLANK HARDWOOD FLOORING

#### 1. Tongue & Groove

.005" tolerance ensures excellent fit and finish

#### 2. Face Layer

Up to 6mm thick sawn North American hardwood

#### 3. Core Layer

10mm thick cross-ply North American hardwood core utilizing StableCor™ Technology

#### 4. Bottom Layer

4.5mm thick sawn North American hardwood

### A match made in nature.

Stairs and flooring: unified. Crafting both systems from the same lumber takes you floor to floor in one seamless transition.
